PROFILE

Big Data & Machine Learning engineer (EFREI Paris), with 4 years of Data Engineering and AI experience at Avanade (Accenture-Microsoft alliance) on major accounts — insurance (AXA France), finance (Natixis), healthcare (Opella), industry (Danone, SAUR) — plus 3 years of application development. Strong expertise in ETL/ELT pipelines, data platforms (Databricks, Snowflake) and generative AI solutions (RAG, multi-agent systems on Azure AI Foundry). Comfortable in consulting environments, working with cross-functional, multidisciplinary teams.

TECHNICAL SKILLS

Generative AI	Azure AI Foundry · Azure OpenAI (GPT-4o, GPT-5) · RAG · Azure AI Search · Azure Content Understanding · multi-agent systems · MCP
Data platforms	Azure Databricks · Snowflake · Delta Lake · Medallion architecture
Languages	Python · PySpark · SQL · Spark SQL · Scala · Java/JEE · Bash · JavaScript
Pipelines / ETL	Informatica Cloud · Azure Data Factory · REST API · Salesforce · CI/CD · batch & streaming
Data management	Dimensional modeling · data quality · governance · traceability & lineage · documentation
Cloud & tools	Microsoft Azure · Azure DevOps · Docker · GCP · Git/GitLab · Jira · Confluence · Power BI · Streamlit · Agile/Scrum

PROFESSIONAL EXPERIENCE

Data & AI Engineer — Azure Databricks migration | Avanade (client: AXA France) 2026 – present
– Migration of data assets and processing workloads to Azure Databricks (Delta Lake, Medallion architecture), with non-regression validation in a regulated environment

Azure Databricks · PySpark · Spark SQL · Delta Lake · Azure Data Factory · Azure DevOps

Data & AI Engineer — Multi-agent GenAI solution | Avanade (client: Opella, Consumer Healthcare) 2026
– Designed and built a multi-agent AI solution (Azure AI Foundry) for automated analysis of drug disclosure images and videos
– End-to-end RAG pipeline (chunking, embeddings, Azure AI Search, reranking); Azure Content Understanding integration; orchestration via Connected Agents / MCP
– LLM observability (GPT-5 call logging, prompt tracing, performance alerting) and end-to-end deployment (Azure Container)
Python · Azure AI Foundry · Azure OpenAI GPT-4o/GPT-5 · Azure AI Search · Azure Content Understanding · MCP

Data Engineer — ETL & AI | Avanade (clients: Natixis, SAUR) Oct 2024 – 2025
– Designed and optimized ETL/ELT pipelines with Informatica Cloud for financial data in a regulated banking environment (Natixis)
– AI solutions for SAUR: semantic enrichment with Azure OpenAI and business data exposure (Streamlit, D3.js)
– Integration of heterogeneous sources (Salesforce, SQL Server) — validation, traceability, flow documentation
Informatica Cloud · Salesforce · Azure OpenAI · SQL Server · PostgreSQL · Python · Streamlit · D3.js

Data Engineer (apprenticeship) | Avanade (clients: Danone R&I, Natixis) Sep 2022 – Sep 2024
– Built ETL pipelines and structured a self-service data model on Snowflake (dimensional modeling)
– Distributed processing with PySpark on Azure Databricks: transformations, aggregations, Spark SQL optimization, partitioning
Azure Databricks · PySpark · Snowflake · Python · SQL · Informatica Cloud · Power BI

Full-Stack Developer (freelance) | HOTSHI D.A.C, Ireland Nov 2021 – Dec 2022
– Corporate website, automated e-mails and administration platform for the Hotshi social network (Laravel 8, Bootstrap, JavaScript, SQL)

JEE Application Developer | MEDIA SOFT, Togo Mar 2018 – Aug 2021
– BINDOO digital finance platform: web services, interfaces, USSD modules (state design pattern); Project Owner for onboarding new financial institutions (Togo, Benin)
– Microfina++: regulatory reporting (tax filing package) and currency-exchange modules, deployed in 5+ African countries; Togo's government criminal-record platform (casierjudiciaire.gouv.tg)
JEE · Java · JavaScript · Primefaces · Bootstrap · PostgreSQL · SQL Server · GitLab

EDUCATION

Master's-level engineering degree — Big Data & Machine Learning	2022 – 2024
EFREI Paris	
Computer science engineering (3rd year)	2021 – 2022
EILCO Calais, France	
Professional bachelor's degree in Software Engineering	2015 – 2018
University of Lomé (CIC), Togo	

CERTIFICATIONS & TRAINING

Certifications: DP-203 · AI-900 · AZ-900 · DP-900 · PL-300 · PL-900 · Informatica Data Integration · Databricks (Fundamentals, Spark Associate)
Training: Microsoft Fabric (DP-600/DP-700) · GCP Professional Data Engineer · advanced Spark & Databricks program (Spark internals, Delta Lake)
